

Alejandro Lopez Saavedra

Alejandro studied biochemical engineering at the Celaya Institute of Technology and obtained his master and PhD degrees in biological and biomedical sciences respectively at the National Autonomous University of Mexico. He is currently an academic researcher in medical sciences at the National Cancer Institute of Mexico where he studies distinct cellular mechanisms of therapy response in cancer. He is also a researcher and professor at the National Autonomous University of Mexico and the School of Medicine and Health Sciences of the Monterrey Institute of Technology. Because of his enthusiasm in microscopy, he has received training in several advanced techniques and he is now the manager of the Advanced Microscopy Applications Unit (ADMiRA) at the National Cancer Institute of Mexico where he provides technical and scientific support to the scientific, academic and medical communities from Mexico and abroad.
